

NICOLE LI

EMPLOYMENT HISTORY

AI Product Manager Tencent	Jun 2020 – Jul 2025
◆ Defined product strategies for content acquisition, source ranking, answer quality, and retrieval logic for AI search products, serving 100M+ daily active users, improving user engagement by 10%. ◆ Identified product opportunities through competitive analysis, market research, user interviews (200+), and survey analysis, driving feature prioritization and roadmap planning. ◆ Owned the quality analytics infrastructure for AI search — defining metrics, sampling strategy, and benchmarking pipelines that enabled continuous, data-driven model iteration. ◆ Translated product requirements into executable features in an agile, sprint-based workflow, working closely with engineering, ML, design, data, and QA. Produced PRDs, analyses, reports to keep stakeholders aligned and ensure clear communication.	
Business Analyst Intern Tencent	Dec 2019 – Mar 2020
◆ Conducted industry research and data analysis to identify market trends, delivering insights through strategic analysis.	
Marketing Intern BMW	Jan 2019 – Dec 2019
◆ Supported marketing strategy through customer analysis, social media operations, and brand campaign execution.	
Account executive Intern Ogilvy	Dec 2017 – Mar 2018
◆ Supported client-facing projects by clarifying requests, coordinating deliverables across teams, and translating feedback into follow-ups.	

PROJECT EXPERIENCE

JobLens — Personalized AI Job Search Decision Platform Python · FastAPI · AWS	May 2026 – Present
◆ Designed a personalized job-search decision framework that models role tracks and priorities, preferences, dealbreakers, seniority, location, sponsorship constraints, and résumé evidence; combined candidate-specific rules, supervised classification, embeddings, and LLM judgments to evaluate opportunities beyond keyword matching. ◆ Trained and iterated a supervised title classifier using 10K manually labeled titles; evaluated multiple model versions with five-fold cross-validation and set confidence cutoffs based on validation results, narrowing 40K+ active postings to ~5K candidates for full-JD AI analysis and reducing the initial search scope by 88%. ◆ Automated job-source growth across 30 ATS and company-specific adapters: discovered career sites and public APIs, found ATS links behind company career pages, built parsers for different platforms, scheduled crawls by employer priority, and added automated retry and closure rules for timeouts and 404s. ◆ Launched a LinkedIn Chrome extension and web application for analyzing individual jobs, and built a Streamlit internal dashboard connected to production PostgreSQL to run automated queries, monitor job coverage and system health, debug incorrect recommendations, and manage review and application queues.	
Price Tracker — Automated Price Monitoring System PostgreSQL · GitHub Actions	Mar 2026
◆ Paste a product link, set a target price, and get alerted when it drops-users manage their own multi-retailer watchlist.	

SKILLS

Programming: Python, SQL, TypeScript	Product: Figma, Miro, PRD, Microsoft Office Suite
Engineering: Fast API, Next.js, React, AWS, Docker, GitHub Actions, PostgreSQL	
AI: Prompt Engineering, LLM Evaluation, Codex, Cursor, Claude Code	

EDUCATION

Northwestern University M.S. in Information Technology	Sep 2025 – Dec 2026 Evanston, IL
Data structures & Algorithms, Software Engineering, Machine Learning, Software Architecture, Networking, Statistics	
University of California, Los Angeles Exchange Students	Jun 2019 – Aug 2019 Los Angeles, CA
Communication University of China M.A. in Advertising	Sep 2018 – Jun 2021 Beijing, China
Beijing Wuzi University B.A. in English	Sep 2014 – Jun 2018 Beijing, China
